Silky Silver 2 Metallic (ZCC)

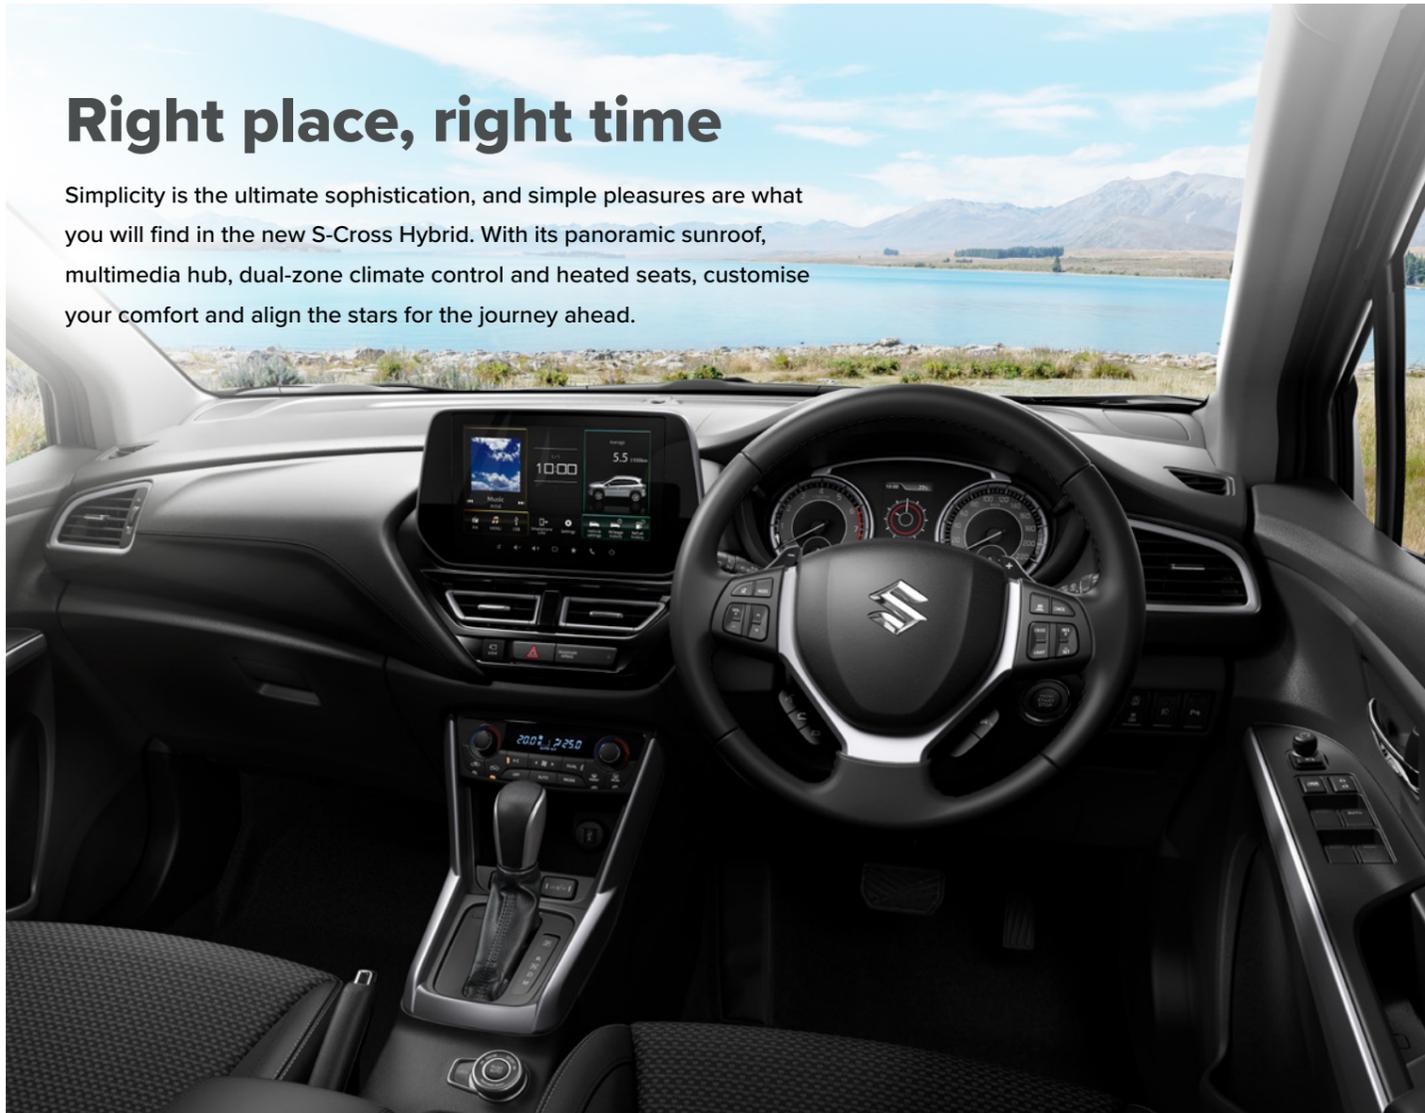

Titan Dark Grey Pearl Metallic (ZZZ)

Cosmic Black Pearl (ZCE)

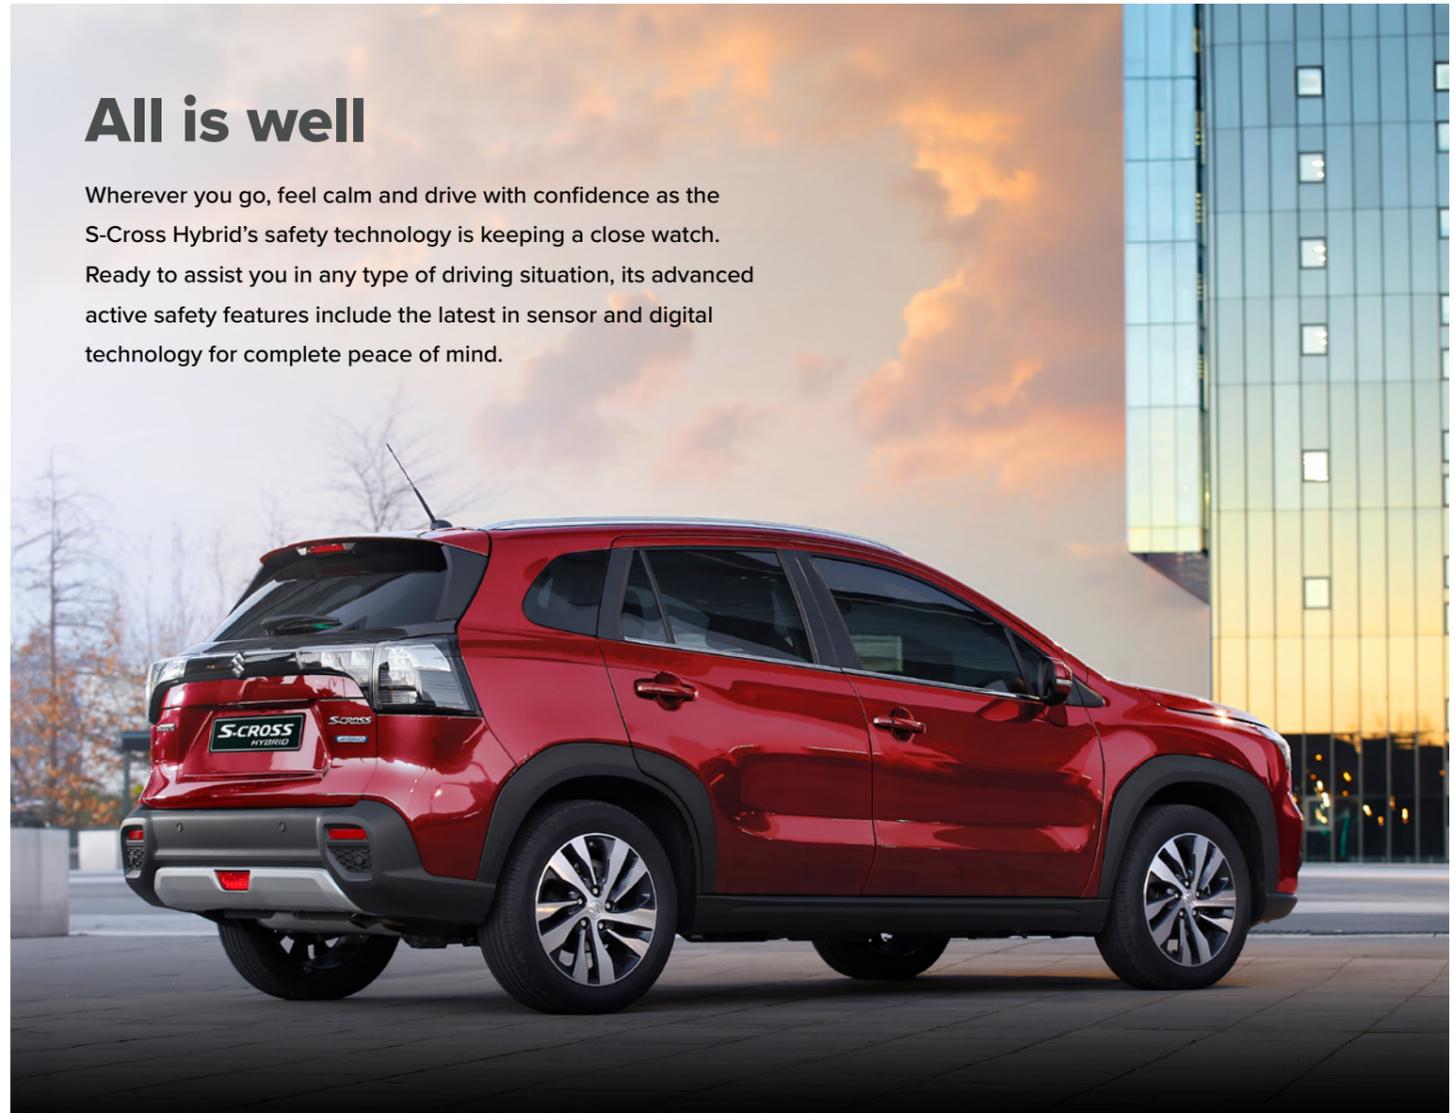

Right place, right time

Simplicity is the ultimate sophistication, and simple pleasures are what you will find in the new S-Cross Hybrid. With its panoramic sunroof, multimedia hub, dual-zone climate control and heated seats, customise your comfort and align the stars for the journey ahead.

All is well

Wherever you go, feel calm and drive with confidence as the S-Cross Hybrid's safety technology is keeping a close watch. Ready to assist you in any type of driving situation, its advanced active safety features include the latest in sensor and digital technology for complete peace of mind.

PANORAMIC SUNROOF

Double sliding glass panels create an extra-large opening for the panoramic sunroof that can be enjoyed from any seat in the car. Bask in sunlight, stargaze at night, or leave it covered – the choice is yours.

INTERIOR SPACE

With its expansive cabin space and optimised visibility, the S-Cross Hybrid comes equipped with a host of onboard storage areas. Featuring a multi-position luggage area, overhead console, front centre console box, an adjustable front armrest box for small items and a rear centre armrest with cupholders.

LED LIGHTING SYSTEM

The auto levelling and light-sensing LED projector headlamps turn on with nightfall or low light. The LED daytime running lamps keep you visible while easing the electrical usage.

KEYLESS ENTRY AND START

Keys buried in your purse or backpack? Keyless entry in the S-Cross Hybrid allows you access through a button on the door handle, while the stop/start button turns on the car without needing the key inserted.

DUAL ZONE CLIMATE AIR CONDITIONING

A high-contrast LCD display makes it easy to set the climate control to your preferred comfort level. There's even a special pollen filter that removes dust and other particles so you can breathe easy.

INFOTAINMENT

A 9-inch infotainment screen displays all your digital connectivity needs, including fuel consumption, hybrid energy flow, onboard Sat Nav and Android Auto and wireless Apple CarPlay.

360° AND REVERSE CAMERA

Get all-around bird's eye and 3D views of your S-Cross Hybrid thanks to four external cameras. Avoid surprises with the reverse camera, providing you with a clear picture of what's behind as you reverse without the need to twist in your seat.

LANE DEPARTURE WARNING AND PREVENTION

At 60 km/h or faster, the S-Cross Hybrid predicts your course and if you drift, vibrates the steering wheel and gives a visual warning. If unintentional lane departure is likely, it automatically assists the driver via the power steering system to keep the vehicle in its lane.

WEAVING ALERT

Weaving alert monitors the vehicle's driving pattern at speeds of over 60 km/h and alerts the driver with audio and visual warnings if the pattern is erratic or straying from its line, due to driver fatigue.

FRONT AND REAR PARKING SENSORS

Handy for parking, the ultrasonic sensors in the front and rear bumpers detect objects within close range, then gives visual and audio warnings.

BLIND SPOT MONITOR

Changing lanes at speeds above 15 km/h is made safer by sensors capable of detecting vehicles located in or approaching the rear blind spots. When a vehicle is detected an LED icon is illuminated in the exterior mirror. Indicate to change lanes, and you'll be warned with an audible alert.

SEVEN AIRBAGS

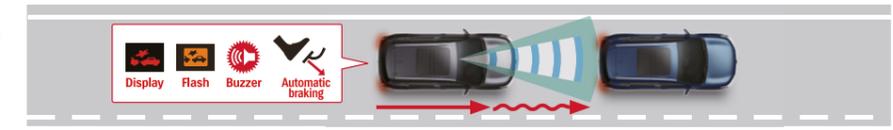

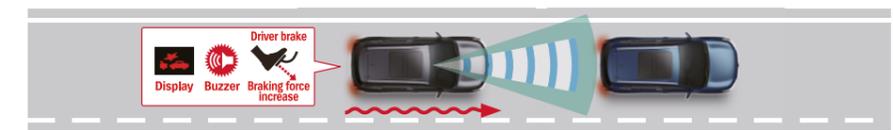

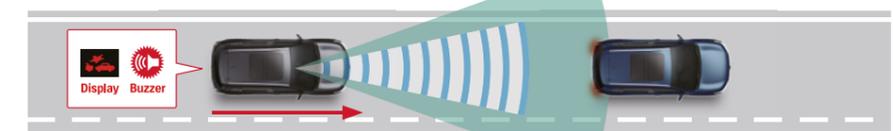

S-Cross Hybrid features seven airbags for the driver and passengers, including SRS front, side, curtain and driver's knee for safety and protection.

ADAPTIVE CRUISE CONTROL WITH STOP & GO

Using millimetre-wave radar, the S-Cross Hybrid automatically maintains a safe distance from the vehicle in front. The stop & go function brings the car to a full stop when needed.

HILL HOLD CONTROL

Hill-holds are made easy by preventing the vehicle from rolling backward when the driver moves their foot from the brake pedal to the accelerator pedal.

DUAL SENSOR BRAKE SUPPORT (DSBS)

Collision risk is lowered with this autonomous emergency braking system, which uses a monocular camera and laser sensor to detect vehicles or pedestrians in front. If a collision is imminent, DSBS issues a warning or engages automatic braking.

*Please do not rely on the Advanced Forward Detection System. It is only an aid and the ability to detect obstacles and lanes, and control the vehicle is limited. Always drive safely.

Go, go, go further

Simply sublime. Knowing what you want, when you want it, is the kind of intuition the new S-Cross Hybrid 1.4L BoosterJet Turbo with 48V SHVS hybrid system offers. Whether working to maximise fuel efficiency during a leisurely drive or adding power when you need it, this self-charging hybrid SUV goes the extra mile.

With no need to worry about plugging in, Suzuki's Smart Hybrid technology combines a powerful petrol engine with fuel-saving features, including engine stop-start, electric engine assist, and torque fill control and boost.

Aspire to inspire

New Zealand roads and conditions can be challenging... have no fear, the S-Cross Hybrid AWD cleverly maximises the performance of the transmission, engine and safety systems depending on the road you are driving on. SNOW, SPORT, LOCK and AUTO – the four different modes on the ALLGRIP SELECT dial make forging your own path a breeze.

AUTO
Prioritises fuel economy in typical driving conditions, switching to 4WD only when slippage is detected.

SPORT
Increases cornering performance by allocating extra torque to the rear wheels. Engine response is improved by optimising the acceleration and torque characteristics.

SNOW
Provides enhanced stability and traction, especially during acceleration, on snowy, unpaved, or other slippery surfaces.

LOCK
Delivers maximum torque to the rear, helping get you out of sticky situations such as deep snow, mud or sand. Automatically switches to Snow mode at 60 km/h.

Specifications

		JLX HYBRID
INFOTAINMENT		
9-inch touchscreen		•
Satellite navigation		•
Seven speaker tuner/SD		•
Bluetooth® and USB input		•
