

VITARA

HYBRID

THE PERFECT GETAWAY

When you're in the mood for adventure, the Vitara Hybrid is ready to help you escape. This suave-looking SUV combines hybrid efficiency with Suzuki's BoosterJet turbo engine for deceptively smooth and ever-efficient performance. Along with all the clever comforts and street-smart technology needed for a quick getaway, you'll be on the run before you know it.

TWO TONE

Bright Red 5 with Cosmic Black Pearl (A9H)

Solar Yellow Metallic with Cosmic Black Pearl (DBH)

Atlantis Turquoise Pearl Metallic with Cosmic Black Pearl (A9L)

Savannah Ivory Metallic with Cosmic Black Pearl (A9N)

Metallic Ice Grayish Blue with Cosmic Black Pearl (DBF)

Premium Silver 2 Metallic with Cosmic Black Pearl (A9G)

Cosmic Black Pearl (ZCE)

Premium Silver 2 Metallic (ZCD)

Cool White Pearl (ZNL)

CAPTIVATINGLY COMFORTABLE

Whether you're on a job or on a journey, inside the Vitara Hybrid is the place to be. Elevated lines, subtle curves, and silver contrasts connect seamlessly, while integrated steering wheel controls are at your fingertips. Its roomy, carefree feel and expansive 'throw it in the back' space, make every assignment seem like a breeze.

CLIMATE CONTROL AIR CONDITIONING

Whatever the season, whatever the conditions, the digital climate control air conditioning makes it a breeze to adjust your comfort level.

ENGINE PERFORMANCE DISPLAY

The advanced full-colour multi-functional display conveys real-time information, including hybrid battery status, running performance, fuel economy and digital clock.

KEYLESS ENTRY AND START

Unlock by pressing a button on the door handle and start the car with the key safely in your bag or pocket (JLX). It's more secure than a regular key, preventing you from locking yourself out.

SPACIOUS INTERIOR

With its expansive cabin space and optimised visibility, the Vitara Hybrid comes equipped with a host of onboard storage areas for added comfort.

TOUCHSCREEN WITH ANDROID AUTO™ AND APPLE CARPLAY

The multi-media infotainment system features a high definition touchscreen with in-built smartphone connectivity through Bluetooth® and USB connection to Android Auto™ and Apple CarPlay. Connect your compatible smartphone to access navigation maps, stream music and podcasts, make handsfree phone calls and voice activated texts, and use other driver-safe apps.

REVERSE CAMERA

Cleverly integrated, the reverse camera helps you park and reverse safely without having to twist around in your seat.

LED LIGHTING SYSTEM

The auto levelling and light-sensing LED projector headlamps turn on with nightfall or low light. The LED daytime running lamps keep you visible while easing the electrical usage.

ON THE LOOKOUT

Getting where you need to go shouldn't be a risky business. With a streetwise collection of advanced safety technologies, such as TECT body design, 7 airbags, parking sensors and hill hold control, you'll be driving with sure-footed confidence in the Vitara Hybrid. When the drive gets adventurous, a suite of autonomous driver assistance systems will kick into gear to help in those sticky and potentially dangerous situations.

DUAL SENSOR BRAKE SUPPORT (DSBS)

Collision risk in the Vitara Hybrid is lowered with this autonomous emergency braking system, which uses a monocular camera and laser sensor to detect vehicles or pedestrians in front. If a collision is imminent, DSBS issues a warning or engages automatic braking.

LANE DEPARTURE WARNING AND PREVENTION

At 60 km/h or faster, Vitara Hybrid predicts your course and if you drift, vibrates the steering wheel and gives a visual warning. If unintentional lane departure is likely, it automatically assists the driver via the electric power steering system to keep the vehicle in its lane.

WEAVING ALERT

Weaving alert monitors the vehicle's driving pattern at speeds of over 60 km/h and alerts the driver with audio and visual warnings if the pattern is erratic or straying from its line, due to driver fatigue.

ADAPTIVE CRUISE CONTROL WITH STOP & GO

Using millimetre-wave radar, the Vitara Hybrid automatically maintains a safe distance from the vehicle in front. The stop & go function brings the car to a full stop and restarts again when needed.

PARKING SENSORS

Parking is safer and easier with ultrasonic sensors in the front and rear bumpers that detect obstacles and send you a warning you can both see and hear (JLX).

BLIND SPOT MONITOR

Changing lanes at speeds above 15 km/h is made safer by two rear mounted side radar sensors capable of detecting vehicles located in or approaching the rear blind spots on either side of the vehicle. When a vehicle is detected a warning LED icon is illuminated in the exterior mirror. If you indicate to change lanes, a flashing LED icon is accompanied by a warning sound alert.

REAR CROSS TRAFFIC ALERT

This feature allows you to manoeuvre safely out of parking spaces when vision is obscured. When reversing, at speeds of up to 8 km/h, the vehicle uses two rear mounted side radar sensors to visually and audibly alert the driver of approaching vehicles on either side.

*Please do not rely on the Advanced Forward Detection System. It is only an aid and the ability to detect obstacles and lanes, and control the vehicle is limited. Always drive safely.

BEST OF BOTH WORLDS

Sporting a 1.4L BoosterJet Turbo engine with 48V SHVS hybrid system, this ingenious low-emitting SUV is at the ready, delivering agility in the city, effortless open road cruising, and plenty of off-road muscle when needed. As a self-charging Smart Hybrid there's no plugging in overnight, offering all the performance and power of an SUV with the fuel efficiency you'd expect from a compact car.

ESCAPE THE SUBURBS

Get out of town and head for the hills in the all-wheel drive Vitara Hybrid JLX. With its intuitive ALLGRIP technology you can easily maximise the performance of the transmission, engine and safety systems whatever the road surfaces. On steep descents, engage the hill-descent control for automatic braking, so you can focus on the steering. Before you know it, you'll be navigating the back roads and trails like a pro.

AUTO
Prioritises fuel economy in typical driving conditions, switching to 4WD only when slippage is detected.

SPORT
Increases cornering performance by allocating extra torque to the rear wheels. Engine response is improved by optimising the acceleration and torque characteristics.

SNOW
Provides enhanced stability and traction, especially during acceleration, on snowy, unpaved, or other slippery surfaces.

LOCK
Delivers maximum torque to the rear, helping get you out of sticky situations such as deep snow, mud or sand. Automatically switches to Snow mode at 60 km/h.
